

Update Your Navigation Maps- For SD Card Equipped Vehicles (Most Subaru Vehicles Before 2018 Model Year)

Go to : <http://www.subarumapupdates.com/index-en-gb.html>

Search for your vehicle and view available update options. Some vehicles will only offer the ability to purchase a new SD card. Most vehicles will offer the option to download to the existing SD card.

If your vehicle is a non-SD card model, you will be routed to the appropriate site and instructions.

1. If downloading is an option, download and install the Toolbox app using for your appropriate computer operating system:

Select your country, vehicle model, year and choose your preferred media type.
Take advantage of a cost saving if you choose the download option!

1. Country:
U.S.A

2. Model:
Forester

3. Year:
2018

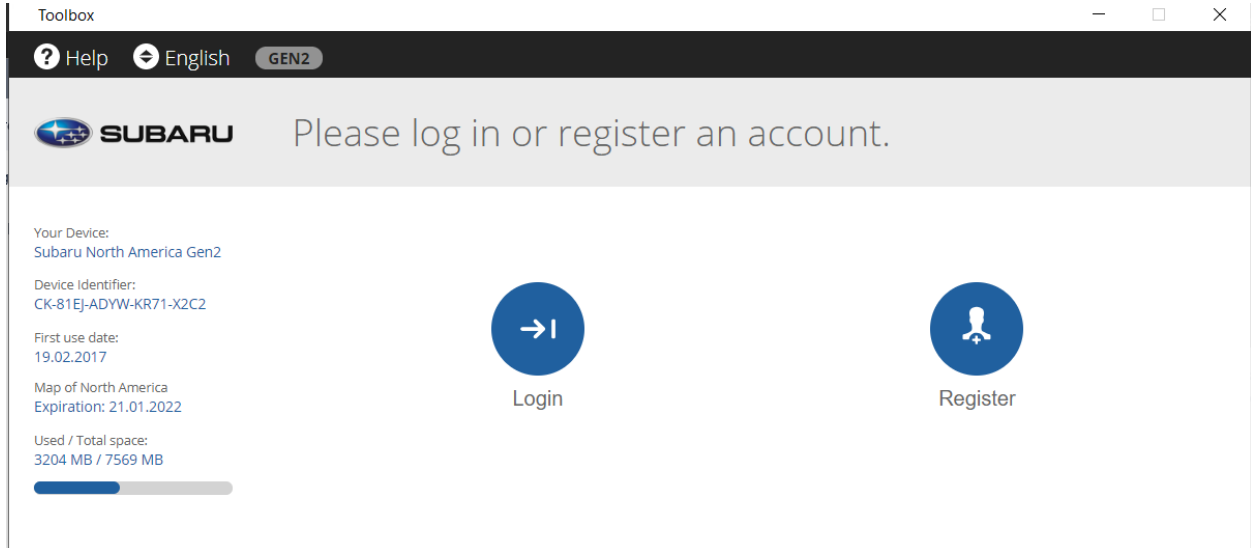

4. Media Type:
Downloadable Update (Free Wit...)

DOWNLOAD FOR PC **DOWNLOAD FOR MAC**

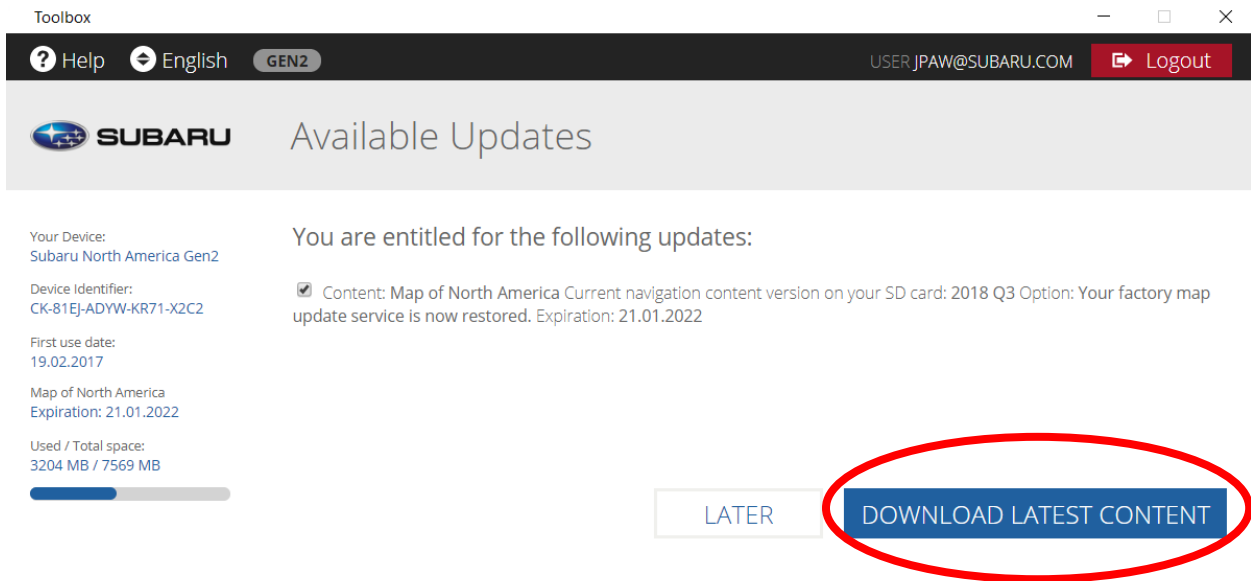

2. Carefully remove the SD card from vehicle (located next to the tune knob) and insert into your computer. You might need a micro SD card adapter if your computer doesn't have the appropriate slot.

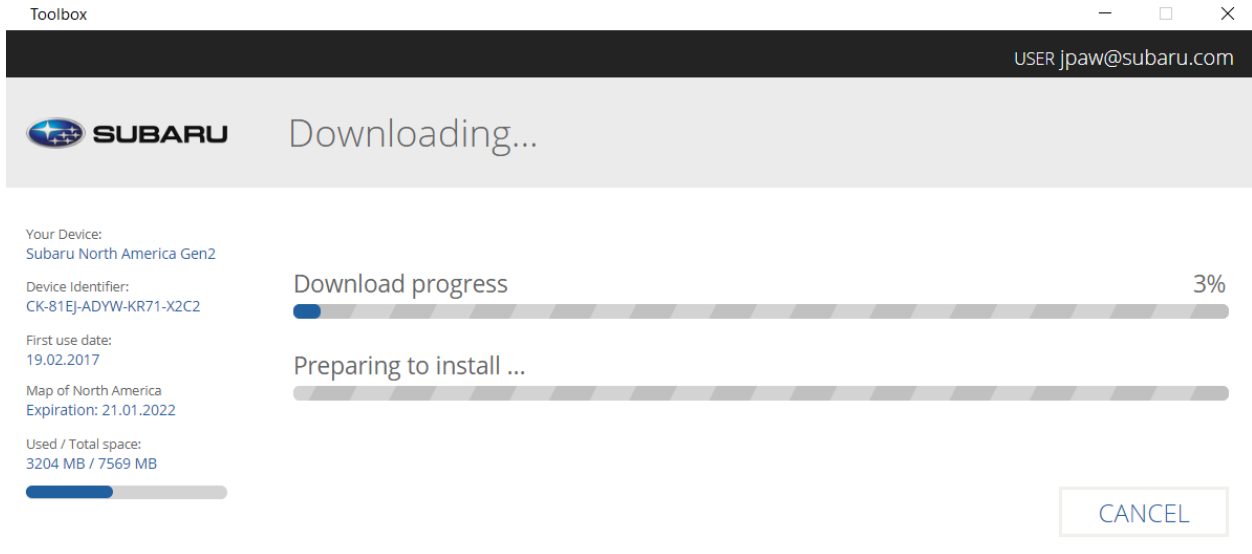

3. Open the Toolbox app and Login or create a new account. This isn't tied to any other Subaru accounts

4. If updates are available, you will see this screen

5. Click download and the download/install process will begin. (You might be prompted to pay for this update if its past a certain amount of years.)
6. Do not remove the SD card and allow update to finish.

Please remove your SD card and insert it into the navigation head unit of your Subaru.
After you start the navigation system it will start using the updated data on the SD card automatically.
